

OPRA Rental Solutions

Equipment Available

OPRA's Rental Product

OPRA's rental product consists of a containerized gas turbine package, customizable to suit the needs of the customer. It has the ability to run on a wide range of fuels including low calorific value and highly contaminated fuels, and it comes with a dual fuel option. The clean, oil-free exhaust at a high temperature of 570 °C is suitable for direct drying applications, as well as for producing steam and hot water. OPRA's gas turbine package is used for many different applications within the Oil & Gas, Combined Heat & Power, Marine and Waste to Energy sectors. Each rental solution includes full service maintenance, and rental agreements will be tailored to specific customer

OPRA's Service Support
